-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the invention of Group III, claims 15-20 in the reply filed on 3/31/06 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Boveja (6,205,359)

Regarding claim 15, Boveja shows a method comprising: placing an implantable pulse generator in an activated mode using an external programming device (turning the device on); and sending a program-selection signal to the implantable pulse generator by the external programming device (by pressing buttons 1-9), wherein the implantable pulse generator stores at least two treatment protocol programs (programs # 1-9; Col. 12, line 39-Col. 13, line 4), each treatment protocol program being associated with at least one stimulation setting, and at least one of the programs being associated with a plurality of stimulation settings; thereafter controlling the operation of the implantable pulse generator by the external programming device (Col. 13, lines 10-28; Claims 15-22).

With respect to claims 16-17, Boveja shows delivering a power signal to the implantable pulse generator by the external programming device and the external programming device

Art Unit: 3766

communicates with the implantable pulse generator using a radio-frequency signal (Figs. 2, 3A-B, 4A-B, 6; Col. 10, line 51-Col. 11, line 16; Col. 13, lines 10-35).

Regarding claim 18, Boveja shows the external programming device can control the pulse amplitude parameters of the pulses generated by the implantable pulse generator (either by using patient override mode or by changing from one predetermined program to another).

With respect to claim 19, Boveja shows the program selection signal designates which of the treatment protocol programs is to be executed by the implantable pulse generator (by pressing buttons 1-9 on external transmitter 42 shown in Fig. 13).

Regarding claim 20, a patient can use the external programming device.

The statements of intended use have been carefully considered but are not considered to impart any further structural or method step limitations over the prior art. The entirety of claim 20 comprises a statement of intended use and is not considered to impart a method step limitation.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. North (2005/0177206) and Daignault (2002/0116036, 6,748,276) each show methods for operating a stimulator with at least two programs including program selection via an external programming device.
